

NALOXONE

TAKING CARE OF OUR OWN

The State Opioid Response (SOR) grant and the West Virginia Office of Drug Control Policy are partnering with the University of Charleston to distribute naloxone to all interested parties.

Naloxone reverses an opioid overdose; it can be administered via nasal spray.

To be trained on administration or to get a dose, contact Dr. Lindsay Acree at 304-357-4379 or lindsayacree@ucwv.edu
